TECHNOLOGY THAT PROTECTS METAL FROM CORROSION

PRODUCT INFORMATION

Zerust® ICT®420-35P is a polyethylene coated kraft paper with proprietary Zerust® ICT® formulations contained within the polyethylene coating (coating on one side of sheet only). Zerust® ICT®420-35P provides powerful corrosion protection to ferrous metals such as iron, cast iron and steel.

Due to its 1 mil Zerust® ICT® polyethylene coating, Zerust® ICT®420-35P provides the additional benefits of increased tear resistance and moisture resistance along with the versatility of paper and powerful Zerust® corrosion protection.

Zerust® ICT®420-35P is currently used to protect a broad range of industrial products including automotive power train parts as well as electrical components during shipment and storage. Use Zerust® ICT®420-35P in interleaving applications, to wrap metal materials for shipment or storage, or in any other application where a packaging paper would be used.
