

APPLICATION FOCUS

Who
Service parts manufacturer and distribution center

What
Recovery of inventory parts that rusted in storage

Why
Fulfill customer orders with clean, first-quality parts

How
Zerust® ICT®620-RR Rust Remover safely and easily removes rust on valuable parts in inventory

Zerust Recovers Rusted Parts—Saving Money and Ensuring Customer Satisfaction

A leading manufacturer of service parts found over half of inventoried steel parts rusting due to improper packaging and a leaky roof. Since inventory was tight, the company contemplated shipping these less than perfect parts out to private and municipal customers and, in so doing, run the risk of disappointing its customers. A Zerust representative learned of the rust problem and provided a sample of Zerust ICT620-RR Rust Remover.

The Solution

The manufacturer tested Zerust ICT620-RR on some of the rusty parts and was very pleased with the results. It not only removed the rust, but was also very easy to use. ICT620-RR works by loosening the iron-oxide from the metal surface and does not affect other metals, paint or plastic. Staff was able to simply soak rusty parts in the rust remover and rinse with de-ionized water. The manufacturer immediately used ICT620-RR to remove the rust on all of the service parts. Zerust ICT620-RR helped recover the rusty service parts, saving the manufacturer money and ensuring that customers were satisfied.

Zerust ICT620-RR quickly and easily recovered rusty parts—saving time, money and satisfying customers.

A severely rusted cast iron impeller.

Use For:

Work In Progress During Operation

OTHER PRODUCTS

VCI Kraft Packaging Paper ICT[®]400 Series

Acid-free, pH neutral, smooth and non-flaking corrosion inhibiting paper and poly paper offer short-term corrosion protection for metal parts. Most paper products are recyclable.*

VCI Packaging Films ICT[®]500 Series

Our most widely used series of products. A variety of films offer short or long-term corrosion protection for parts and equipment during storage or shipment. Most film products are recyclable.*

Rust Removers and Cleaners ICT[®]600 Series

Highly effective rust removers for light to severe rust removal.

All ICT[®]600 series rust removers are non-toxic, non-hazardous and non-corrosive.

Liquid Additives and Coatings ICT[®]700 Series

Temporary corrosion protection for parts in-between production processes, during storage, or for added protection to the ICT[®] 500 series products during ocean shipments.

VCI Vapor Diffusers ICT[®]800 Series

Self-contained, portable products that diffuse Zerust[®] ICT[®] chemicals to protect metals within enclosures, such as tool boxes, electrical boxes, etc.

*Consult your Zerust representative and federal, state and local regulations.
