Sandia National Laboratories
505/844-2071
fax: 505/844-7910
e-mail: dgenos@sandia.gov

May 12, 2008

Mr. G. Patrick Lynch
Northern Technologies International Corp.
4201 Woodland Rd., PO BOX 69
Circle Pines, MN 55014

Dear Mr. Lynch:

On behalf of NACE International, I want to thank you for your support of both Dr. Efim Lyublinski and Dr. Jim Henderson within technical committees.

Dr. Henderson is the Vice Chair of Task Group (TG) 215 as well as Vice Chair of the sponsoring Technology Exchange Group (TEG) 093X, with future expectations of continuing service as its Chairman. Dr. Lyublinski worked in the background and he took the early lead role after he was asked in 2002 to take on the TG 215 Chairmanship, a position he has fulfilled to the present day. NACE TG 215 has published NACE SP0208-2008, "Laboratory Test to Evaluate the Vapor Inhibiting Ability of Volatile Corrosion Inhibitor Materials for Temporary Protection of Ferrous Metal Surfaces." This is a very important publication for NACE, made possible, in part, through your support of Dr. Lyublinski's and Dr. Henderson's activities within the technical committee structure.

Thanks again for your contribution.

Sincerely,

A handwritten signature in black ink that reads "L. James Moore". The signature is written in a cursive, flowing style.

James Moore
TCC Chair

cc: Dr. Efim Lyublinski
Dr. Jim Henderson
